

# **Publicaciones derivadas de las tesis defendidas en el Programa de Doctorado de Física Teórica**

Sesenta tesis han sido defendidas en el Programa de Doctorado de Física Teórica durante 2015–2021. Estas tesis han derivado en 330 artículos publicados en revistas internacionales con peer-review. Esto implica un promedio de 5.5 artículos publicados por cada estudiante, derivados del trabajo realizado para sus tesis.

A continuación se muestra la lista de artículos.

La figura 1 muestra el número de publicaciones en función del año de trabajo de tesis. La mayoría de los doctorandos publican sus artículos entre el tercer y cuarto año de trabajo.

La figura 2 muestra el número de publicaciones por año de publicación en función del año de admisión de los doctorandos y la figura 3 muestra el número de publicaciones por año de publicación en función del año de defensa de la tesis doctoral.

## Publicaciones derivadas de las tesis defendidas en el Programa de Doctorado de Física Teórica

- [1] Narain, K. S. and Piazzalunga, N. and Tanzini, A., *Real topological string amplitudes*, **JHEP** **03** (2017) pág. 080, arXiv: 1612.07544 [hep-th].
